

Create Your Own Ambassador Graphic!

Step 1: Choose your template

- Select one of the three templates.

Step 2: Add your photo

- Select the photo you want to use. A photo with extra space at the top and bottom will work the best in the template.
- Click the icon in the grey area and select your photo.
- Adjust the photo as needed by right clicking the photo and selecting “Crop.”
- You can adjust the photo by moving it up and down or zooming in or out by dragging the circles at the top of the image up or down. Make sure the top of your image is within the slide limits.

Step 3: Save your graphic

- Click on the specific slide you want to save from the PowerPoint.
- Go to “File” then “Save A Copy.” It will prompt you to select a place to save.
- Before you click “Save,” change “Save As Type” to “JPEG File Interchange Format.”
- Click “Save.”
- When it prompts you to export, select “Just This One.”

Now you’ve saved your graphic and can share it on your social media channels!
